

Parabola Volume 45, Issue 3 (2009)

Dear Readers

I am delighted to be able to inform you that *Parabola* is now available on-line.

The Parabola Online project was initiated by a grant from the U-Committee of the University of New South Wales. Parabola Online will include an archive of *Parabola* issues and the development of other online mathematical resources. The archive currently has the past ten years of *Parabola* material, freely available, except for the current year in which only selected articles are available electronically. The archive will be extended back to the first issue in 1964. All articles in the current year will still be available in hardcopy to subscribers through the Australian Mathematics Trust (www.amt.edu.au)

In the future we plan to add links to useful mathematical resources for secondary school students and their educators. If you would like to suggest a particular site for us to include then please let us know via email.

In this issue of *Parabola* we have reprinted the article by Farid Hagggar from the previous issue to correct printing errors. Solutions to competition problems that were affected by printing errors have been reprinted in the Errata in this issue.
